**INVITATION TO THE
INFORMATION SESSION ON ‘ONE SUBSTANCE, ONE ASSESSMENT’ FOR STAKEHOLDERS
AND CITIZENS**

**1 JUNE, 9:00 – 13:00
ON-LINE**

The Chemicals Strategy for Sustainability sets the objective to move towards ‘one substance, one assessment’ approach by improving efficiency, effectiveness, coherence and transparency of the delivery of safety assessments of chemicals across all relevant legislation.

In line with the commitment of the strategy, DG Environment, in consultation with all relevant Commission Services has set up an [Expert Working Group on One Substance, One assessment](#) to support the implementation of this objective.

The group is composed of authorities from Member States, Norway, Iceland and Lichtenstein, representatives of EU Agencies (European Chemicals Agency (ECHA), European Food Safety Authority (EFSA), European Environmental Agency (EEA), European Medicines Agency (EMA) and European Agency for Safety and Health at Work (OSHA)) and relevant Commission services.

In order to inform stakeholders and citizens about activities of the group and about the actions on ‘one substance, one assessment’ in general, DG Environment organises an information session for stakeholders and citizens held back-to-back with the meetings of the expert working group. This information session will take place on 1 June 2022 and the latest information on the event including the agenda is available [here](#).

The event can be followed only online through the web streaming service available at the link [here](#). The participants will be able to interact with presenters and ask questions via a
