EDITORIAL

Filipa Melo de Vasconcelos

General-Subinspector

In this edition we want to make available to all participants and potential interested persons in these matters, the oral presentations on the 2 International Workshop's that took place in Lisbon on 22-23-November/2017. You'll find all files clicking on the programme of the respective Workshops - **Communication of Emerging Risk's** and **Crisis & Emergency Risk Communication**.

These Workshops enhances the collaboration of ASAE and Counterparts with its institutional stakeholders in the area of Communication of Emerging Risks and Crisis Preparedness and It is also in line with EFSA 2020 Strategy. These events, aimed:

- To promote the approach on concepts, principles and procedures, for the production of scientific knowledge, even if with uncertainty, and of course with some scientific divergence, could be communicated in a clear and efficient way;
- To share experiences and best practices for common approaches and multidisciplinary coordination that allow reducing the GAP between risk assessors and risk managers and the communicators!

The proposed goals were thought to promote the use of the forums that already have strong links with universities, from several countries and different institutions, and therefore trying to make a perfect match to bring and congregate projects with European and International projection aligned with the priorities set out in the EU-RAA on the field of communication, such as:

- i) Networking of key players, promoting cooperation amongst actors (scientists, risk assessors, risk managers and risk communicators);
- ii) Developing capacity in methodology on the field of communication; and
- iii) Exploiting risk communication activities.

To conclude, we felt and received as feedback of these events, based on recorded outcomes, very good remarks! Namely, we can testify: *Valuable instruction, Experience & networking opportunities* that give us inspiration to continue developing ways of working to achieve greater multidisciplinary collaboration, with different countries at different institutional levels.

As major and general conclusion we must Practice, Practice and Practice in times of peace between crisis & last but not least Anticipate and Prepare for the next Crisis/emergency event, and also to develop good methodologies of Risk Assessment that allow us to identify and anticipate the occurrence of new Emerging Risks.

As final remarks, I would like to underline, the main keys of these two days:

Capacity building and developing technical skill's, focusing on Preparedness and anticipation to **Strengthening Cooperation** with counterparts!!

Enjoy the following presentations and Thanks so much for your attention!

Communication of Emerging Risks

TIME	SUBJECT	SPEAKER
08:30-09:00	Registration	
09:00-09:15	Welcome and opening of the Workshop	ASAE - General Inspector of ASAE, Pedro Portugal Gaspar
	Workshop objectives and general outputs	ASAE - General Subinspector of ASAE, Filipa Melo de Vasconcelos PT EFSA/EREN Representative, Maria do Céu Costa
09:15-10:00	Key note Speaker	Pedro Graça, Professor of the Faculty of Nutrition and Food Sciences of the University of Porto (FCNAUP), Director of the National Programme for the Promotion of Healthy Eating
